MISSY WRYN'S ***CLINIC HIGHLIGHTS*** DVD MAKES IT DEBUT

"I took the best of the clinics over the year to make a comprehensive DVD of my "W"Holistic Natural Horsemanship training methods", Missy says.

The DVD Includes:

- ***The Four Core Emotional Concerns*** that you and your horse share
- ***"W"Holistic Joining*** – this invokes your horse's instinct that you are the leader without having to round pen and exhaust your horse
- ***Three Foundational Requirements*** that every horse needs to learn to be safer within your herd of two, you and your horse
- ***Five Fundamental Ground Techniques*** that translate under saddle for a safer ride

PLUS 50 Minutes BONUS Footage of Benny the "Orphan Syndrome Horse". "Watch how I work with Benny on the ground and then under saddle while dealing with his unpredictable dangerous behavior" Missy adds.

Easy to learn and lots of fun while you and your horse deepen the exchange of confidence and trust between you, creating a companionship that your heart desires with your horse all the while providing the leadership your horse genetically requires. The transformation between you and your horse will be remarkable as you apply the simple techniques as demonstrated on the DVD. Using terms of endearment and displays of affection are highly encouraged and supported. YES your horse will still respect you when you are affectionate – those who say otherwise are simply wrong. Horses are affectionate animals as seen in the herd and respond beautifully to affection, kindness and understanding; that does not minimize your leadership. Being a kind and affectionate leader is truly superior when it comes to working with your horse and I have proven this over and over with many different types of horses with dangerous behavior and you'll see it for yourself in the ***Clinic Highlights*** DVD.

The complete "W"Holistic Horsemanship DVD Series will be available October 2007. The next four are:

- ***Training the Whole Horse***
- ***Five Fundamental Ground Techniques***
