Excerpt from the article:

My specialty is problem horses with dangerous behavior. I use “W”Holistic Natural Horsemanship® methods and techniques for training all horses from starting under saddle to serious behavior problems. “W”Holistic Natural Horsemanship® is a training method taking into account the “w”hole horse. Often time's behavior problems are caused by pain that can be treated with appropriate equine dentistry, chiropractic therapy, acupuncture, barefoot rehab and nutrition analysis. Training the behavior and not the source of the behavior is what I call “allopathic training” which does not work if the horse is in pain. Many horses come to me as the last stop before they are on their way to the auction or slaughter house. I’ve had clients tell me that Natural Horsemanship trainers who sound just like me over the phone have given up and told the owner they should get rid of their horse. Thankfully, these clients love their horses enough to try one more time giving me the opportunity to provide appropriate care, while restoring the partnership teaching safer handling and riding techniques.

***Soon to be released*** Missy Wryn’s book and illustrative DVD “W”Holistic Natural Horsemanship®. *A book you can actually use with everyday challenges and stories that speak to your heart.* .
