Missy endeavors to set a new standard in Natural Horsemanship by training the whole horse. Many issues are pain-related, not a

training issue. From haltering to joining up, using pressure, release, and body language, Missy demonstrates that kind leadership, with the 4 Core Emotional Concerns in mind, is something horses can understand, and something we can do. Well-produced DVD with footage of different horses, with different behaviors. Viewers will learn how to balance our nature with the horse's nature, and allow rather than force the horse to learn.
